

YEGGONI MADHURI

📞 8639492875 — ✉ madhuriyeggoni@gmail.com —  LinkedIn —  GitHub

Summary

Final-year B.Tech student in Computer Science with hands-on experience building AI/ML, quantum ML, and web-based solutions. Proficient in Python, SQL, AWS, Linux, and modern development tools, with experience developing computer vision and quantum ML systems and improving responsive web interfaces. Two-time hackathon runner-up with experience taking technical solutions from development to live evaluation and presenting results to technical panels.

Technical Skills

Languages: Python, SQL, C, JavaScript, HTML5, CSS3

Backend & Cloud: Flask, Django, REST APIs, AWS (EC2, S3, IAM), Linux

AI/ML: Machine Learning, PyTorch, scikit-learn, TensorFlow, CNN, Qiskit, Quantum ML, PennyLane

Development & Tools: Git, GitHub, VS Code, React

Experience

Web Development Intern — Levite Tech Private Limited (Vishakapatnam) Jun 2026 – Aug 2026

- Contributed to web development projects using React, JavaScript, HTML, CSS, and PHP/MySQL, implementing UI screens and application functionality.
- Improved responsive UI components and logic modules while following GitHub-based development workflows and code review practices.

GeeksforGeeks Public Outreach Lead — Siddhartha Institute Dec 2024 – Dec 2025

- Led technical community initiatives reaching 500+ students through coding opportunities, technical events, and learning activities.
- Organized and spearheaded the “Tech Duo Wars” event, driving public outreach and maximizing student participation.
- Delivered workshops on Linux fundamentals and System Design in collaboration with GeeksforGeeks mentors.

Achievements

Runner-Up — Amaravati Quantum Valley Hackathon (AQVH) 2025 Feb 2026

QADIS — Quantum Anomaly Detection Intelligence System (fraudguard.vercel.app)

- Built a multi-domain quantum ML platform achieving 94% fraud detection, 91% sepsis prediction, and 73% zero-day attack detection using Fidelity Quantum Kernels and QSVM.
- Engineered NISQ-optimized circuits with adaptive ZZ Feature Maps, achieving 7–24% improvement over classical baselines across MIMIC-III, Kaggle Fraud, and NSL-KDD datasets.

Runner-Up — Make for Madanapalle Hackathon (Titan, Inunity) Oct 2025

Kaiko-Ken — Silkworm Gender Classification AI

- Developed a Python and CNN-based computer vision pipeline for automated silkworm cocoon gender classification, achieving a reported 30x efficiency gain over manual inspection.
- Secured in-principle approval from Central Silk Board scientists for dataset collaboration toward transitioning the prototype into a production-ready application.

Additional Achievements:

- Awarded an **Academic Topper Certificate** for outstanding academic performance in B.Tech 3rd Year.
- Secured **First Prize** in Tech Charades at the CSE Association Event.
- Secured **First Prize** in Idea Blueprint at the CSE Association Event for presenting innovative technical ideas.

Education

Siddhartha Institute of Science and Technology 2023 – 2027

B.Tech in Computer Science and Engineering — CGPA: 9.5/10

The Nandyal Junior College 2021 – 2023

Board of Intermediate Education — 965/1000 (96.5%)

Zilla Parishad High School 2009 – 2021

Secondary School Certificate (APSSC) — 584/600 (97.3%)

Certification

NPTEL — Introduction to Industry 4.0 and Industrial Internet of Things (View Certificate)
